EDUCATION

Associate of Science in Computer Support
Georgia Northwestern Technical College · Rock Spring, GA

Bachelor of Science in Software Application Development and Human-Computer Interaction
Mercer University · Atlanta, GA · Graduating 12/2024 · 4.0 GPA

RELEVANT EXPERIENCE

Commercial Communications Technician
Xfinity   **March 2016 - February 2023**
· Consistently provided exceptional product troubleshooting and installation services to Xfinity business partners.
· Utilized modern technology and techniques to solve complex hardware, software, and networking issues.
· Solved challenging tasks daily by finding creative and unique solutions.
· Inspired teamwork by encouraging collaboration on difficult work orders.
· Steadily improved knowledge and experience by constantly requesting challenging work orders and assignments.

PERSONAL PROJECTS

BloggyAI
https://johnnyyork13.github.io/bloggyAI
· Developed a dynamic blog website leveraging ChatGPT's GPT-3.5 Turbo API for generating AI-powered blog posts, enhancing content creation efficiency and diversity.
· Implemented user authentication and profile management functionalities to enable personalized experiences, including user profiles and saved posts for future reference.
· Utilized modern web technologies like React.js for the front end and Node.js with Express.js for the backend, ensuring scalability and maintainability.
· Integrated features for user engagement, such as liking and commenting on posts, fostering community interaction and feedback.

ViceWaves
https://vicewaves.com
· Developed an e-commerce platform with React and Node.js, leveraging MongoDB for data management.
· Integrated PayPal and Printful APIs for seamless transactions and merchandise fulfillment.
· Utilized RESTful APIs to fetch product information, manage cart functionality, and process payments securely via PayPal integration.
· Designed user-friendly interfaces for browsing, purchasing, and managing Synthwave merchandise.
· Conducted thorough testing and optimization to ensure reliability and performance.

MyBear
https://johnnyyork13.github.io/bearbook
· Developed a modern social media platform tailored for Mercer University students, mirroring popular social media experiences.
· Incorporated Mercer-specific features including curated campus links and resources, enhancing relevance and utility.
· Implemented user profile customization and a robust friend system for student-faculty networking.
· Utilized React.js, Node.js, Express.js, and MongoDB for scalable, performant development.
